Professional Summary

Fullstack Developer with 3.4 years of experience building production-grade web applications using React.js, TypeScript, and Next.js. Strong expertise in Redux Toolkit, React Hooks, component architecture, testing, and performance optimization. Built reusable component libraries, implemented localization across 8 languages, and developed full-stack applications using Node.js, Express, MongoDB, and PostgreSQL. Seeking Full-Stack Developer roles in product-driven teams. Immediate Joiner in Pune, Maharashtra.

Experience

Software Developer April 2023 – July 2026

Cognizant (Client: EY)

- Improved React dashboard performance by 20%, measured with Lighthouse, using memoization and lazy loading.
- Led a five-member team to implement localization for eight languages across applications and microservices.
- Built an internal localization tool that reduced manual translation time by 70%.
- Converted Figma designs into pixel-perfect, production-ready React + TypeScript components, improving session duration and click-through rate by 15%.
- Led a team to win Cognizant Ideathon by developing an AI risk forecasting tool that improved defect detection lead time and expanded risk coverage by 40%.

Projects

NoteStack.AI | *React, TypeScript, Node.js, MongoDB, Gemini API* | **GitHub** Jan 2026 – March 2026

- Built an AI-powered notes platform that converts user notes into editable action plans and Kanban tasks using Google Gemini.
- Developed a context-aware pipeline that ranks related notes, validates AI responses with Zod, and caches generated plans using content hashes.
- Implemented a drag-and-drop Kanban board with an AI focus picker, deterministic fallback, and server-enforced workflow constraints.
- Secured the full-stack application with JWT authentication, bcrypt hashing, protected REST APIs, and user-isolated MongoDB data.

DropDox | *Nextjs, TypeScript, PostgreSQL, Clerk, ImageKit* | ***GitHub*** June 2024 – Aug 2024

- Full-stack secure file storage platform focused on performance and real-time interactions
- Implemented secure user authentication with Clerk with OTP verification flow.
- Architected the frontend using Next.js and TypeScript, creating a responsive, drag-and-drop UI with React for dynamic file managemen
- Integrated ImageKit for drag-and-drop file uploads and developed core features like star and trash .

Technical Skills

Languages: TypeScript, JavaScript(ES6+), HTML5, CSS3, SASS, Java
Frameworks: React, Next.js, Context API, Redux, React Hook Form, React Query/Tanstack Query, Axios, Jest
Databases: PostgreSQL, MongoDB, MySQL
Developer Tools: Git, VS Code, Git & Github, Jira

Education

Shivaji University Kolhapur, Maharashtra
B.Tech *Mar. 2018 – August 2022*
